Downloading your Stat to your Cache Page.

• To get your **Cache Stats** to your **GC Public Profile** you first need to make sure that you have all the **right setting setup in GSAK**.

• Click on the Options/Tool Box Tab you Should see the screen that you which Should be General Tab if not Click on the General Tab & check that your User ID is correct.

See Screen shot below for example.

(Note: I have used me Details in the examples so don't use these numbers as you won't get the result you are looking to achieve)

rri	Options
I	General HTML Locations Display Abbreviations Keyboard shortcu
n af	Default action when you double click on a waypoint
20 8,	Open waypoint URL
Ba Lii	Method for matching placed (hidden) and found eaches C Exact match C Wild card match O Winer ID# C RegEx
əf	(1338349)
)0	Application data User/Owner ID:

This is the best way to get the best results when you export your stats. **Your User ID**: can also be found on any of the caches you have Hidden. See example below.

Edit Current Y	Waypoint
Waypoint Code	GC1J9WG
Name	Peninsula Border Line TB & GC Lounge Spell Chec
Country	Australia
State	VIC County
Туре	Traditional 🔽 Container Large 🗨 Lock 🗌 (Sto
Owner Name	Rigger64 Owner ID 1338349 First to
	User/Owner ID:

• Ok now You have set your **User ID**: (Not Mine from the examples) you can now exit this screen.

Now **Click** The **Macro Tab** on the **Tool Bar**. (See example's below.)

6	GSAK 7.6.	2.45	DataBa	ase: Found	(Registe	red to:

- As you set these setting **Click** on the **Ok** to set the settings as you Click on the **OK** tab it will take you back to the main settings Screen. Once all the settings are to you requirements Click on the Save Tab on the Main screen to save the settings that you have just setup. Now it's time to run the Macro.
- Now Click on the **OK** Tab on the main Settings Screen & the Macro will start running. During the next few Slides you see the next few steps to getting Your Stats onto your Profile Page.
- The next screen you will see will be the First Step of the **HTML** page of your Stats.

• Once you have this screen up you need to **Right Click on the Blank part next to your Stats page** This will bring up a new Menu from this Menu you need to then **Click on View Source**. (See example below)

• Now that you have **Clicked** on **View Source** the next Screen you will see will be the **HTML** coding that will need to be copied to your profile page. (See example below)

 Now that you have the HTML Code you need to copy this by Right Clicking then selecting Copy. or Pressing Ctrl+A. Anywhere within the Coding. (See example Below)

Once you have Copied All of the coding this window can now be closed as we no longer need this window.
 Now you need to open you GC Profile page by Clicking on your name on you GC Page. (See example below)

Hello Rigger64	!	
25	Premium Member Member Since: 11/3/2007 Reneval Date: 3/29/2010	Clich here to go go your Profile Page
RO	Caches Found: 395 Caches Hidden: 48	
	My Profile Log Out	

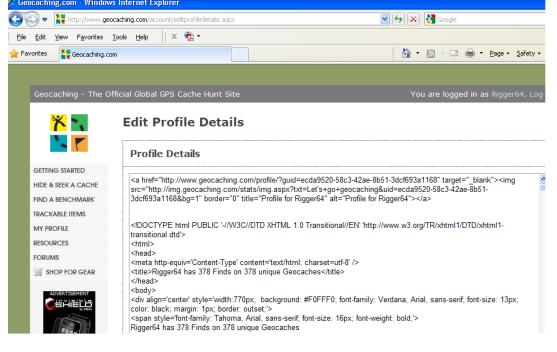

• Once you have Clicked on the part it will take you to your Profile so that you can editing can begin on your page. (See example below)

]

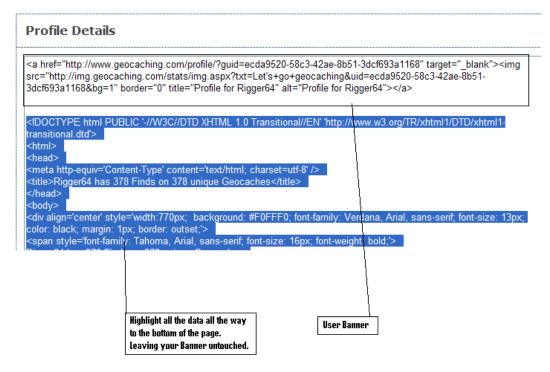

Then Click to go to Your Public Profile.

Now that you have Clicked on the <u>My Public Profile</u> this will now take you to your Profile page that can now be Edited. (See example below)
 ^C Geocaching.com - Windows Internet Explorer

• Now highlight all the data that will need to be changed & only the Data that needs to be changed you will notice that some of my data has not been highlighted as this will not be getting deleted as it is the little banner that sits above the stats page. (See example below)

Edit Profile Details

 Now that you have Highlighted all the Data that you want to delete press the Backspace Key on your keyboard this will delete all the highlighted data so now you should have an all but blank dialog box/page. (See example below)
 Edit Profile Details

Profi	le Details
src="ht	="http://www.geocaching.com/profile/?guid=ecda9520-58c3-42ae-8b51-3dcf693a1168" target="_blank"> </img
	Profile page with all the data Deleted.

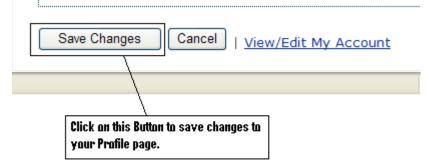

Now that you have deleted all the old data you can now insert the new data that you copied from the HTML page before. By Right Clicking on any part of the page & selecting Paste or Ctrl+V. (were nearly there)(See example below)

Edit Profile Details

• Ok now were almost there Now all you need to do is **Click** on the **Save Changes Tab.**

- That's it Were all done Now go checkout your Public Profile.
- Here are some Keyboard Shortcut for you.
- By Pressing & holding Ctrl key the letter you will be able to access the shortcut when you see the Ctrl+(the letter). It means to press & hold the Ctrl key the tap the Letter that corresponds to the Shortcut you want.
- Ctrl+A = Select All
- Ctrl+C = Copy
- Ctrl+X = Cut
- Ctrl+V = Paste
